Experience

OneArvo | Software Developer Engineer   Noida | Dec 2023 - Present

- Began as a React frontend developer and, within a year, expanded my skill set to include React Native, AWS (Lambda, API Gateway, Amplify, CloudWatch, Cognito, S3, DynamoDB, etc.), Flutter, and blockchain technologies like Polygon and Algorand.
- Consistently delivered all assigned projects in 50% of the allocated time frame.
- Maintained the company's codebase while mentoring and supervising an intern.
- Independently developed the entire **Dcode** website from scratch, including designing the complete architecture and handling both frontend and backend development using AWS.
- Boosted user engagement by 24% within a month through optimization efforts and client collaboration.
- Implemented NFC/RFID technology and Vision AI-based QR codes designed for enhanced security and authenticity.
- Oversaw end-to-end production for Android and iOS applications, ensuring seamless deployment and user experience.

Primavision | Software Developer Engineer Intern   Delhi | Sept 2023 - Nov 2023

- Created an app from the ground up that uses AI to generate text, images, and videos
- Played around with tools like React, Node.js, and MongoDB to ensure smooth operations
- Tackled challenges as the first developer onboard and completed tasks from interface design to GitHub code management
- From designing awesome interfaces to coding and making sure everything's in order on GitHub, I've done it all. It's been a wild ride, but I've loved every bit of it.
- Being the first developer on board was nerve-wracking! But I took a deep breath, tackled challenges oneby one, and I'm super proud of how far I've come.

Skills

Javascript, HTML5, CSS, Python, Typescript, Solidity, Typescript, Reactjs, Nodejs, Express, Nextjs, Vite, React Native, Flutter, Git, Github, Chakra, Postman, Netlify, Vercel, Heroku, AWS, MongoDB, MySQL, PostgreSQL, Android Studio, Xcode, Docker

Live Projects/Open Source

[ARVO | Link](#)
- Utilized TypeScript for robust and maintainable code and integrated QR code and NFC technologies for secure product authentication

- Developed a mobile app using React Native and created/deployed smart contracts on platforms like Polygon and Algorand

[DCode | Link](#)
- Independently developed the entire Dcode website from scratch, including designing the complete architecture and handling both frontend and backend development using AWS.

[be-1percent-better | Link](#)
- Maintains a repository journaling daily learnings to emphasize the importance of continuous growth

[GME Auhtenticator | Link](#)
- Built a Flutter application for authenticating standard QR codes, implementing robust security measures to ensure accurate and reliable verification.

Education

Amity University Online (MCA)   Online

January 2024 - December 2025

JIMS Engineering Management Technical Campus (JEMTEC)   Greater Noida

August 2018 - May 2021   Percentage: 80.04%

Bal Bharati Public School   Noida

April 2016 - April 2018   Percentage: 82%

Bal Bharati Public School   Noida

Class 10th   CGPA: 8.2

Certifications
- Fullstack Web Development Internship Program - Super Intern (Edureka)
- Certified React.js - Advanced (Cutshort)

Honors & Awards
- State Level Table Tennis Competition: 3rd position
